

Sustaining Student Learning and Success

A Holistic COVID-19 Response Strategy

Tuesday, September 29th, 2020
10:15 – 11:15AM

Join us as a team of school design professionals share their research on reopening schools in a manner that will minimize the spread of the COVID-19 infection. The panelists will share a multi-disciplinary approach that looks at classroom configurations, building infrastructure improvements, learning strategies, and teaching practices that use pedagogy, bioscience, and environmental engineering to create healthy spaces.

In recognition of the limited time, public funding, and resources to create the ideal situation in our schools, our team will discuss methods to achieve some of these goals quickly and economically as possible. Some solutions only take a bit of imagination and being open to change!

Fielding International Presenters

- Jay Litman** – Architect/Partner, Fielding International
